crucial central services such as payroll and will be undertaking its new partnership with IBM to e transfer of these services to an external provider its staff. (During the year, the department will also his relationship.) The department also houses the Deputy Ministers Audit Committee.

e department supports government decisionget formulation. The Department of Finance relies byees to achieve its objectives, and I would like to

#### 2. Department Mandate

The mandate of the Department of Finance flows primarily from the *Finance Act* which includes a leadership role in establishing and administering the fiscal framework and financial controls of the Province, and providing meaningful, transparent financial reporting, including the provincial budget, forecasts and Public Accounts.

The Department of Finance provides professional services and support to provincial government departments and entities, manages the debt of the Province, regulates select financial institutions and provides policy oversight to the securities sector. The department delivers financial, accounting, fiscal and economic policy advice and provides statistical services to help inform decision making across government, and regulates credit unions and the securities sector. Through its Payroll, Payment Transaction Services and Government Accounting divisions, the department also provides important services to the broader public sector, including district health authorities and school boards. The department supports the Minister of Finance in overseeing certain crown corporations and agencies, such as the NSLC.

#### 3. Government Priorities

#### Get back to balance and ensure government lives within its means.

The Department of Finance undertakes analysis that responds to the broader economic and financial climate and on the basis of this, provides advice and recommendations to the decision making structures of government. The department ensures extensive, ongoing support to government fiscal planning through research, analysis and consultation across the provincial government and with federal counterparts. This year marks the end of Back to Balance process, which the Department of Finance has led on behalf of the government over the past four years. It will be an important year to monitor fiscal and budgetary developments as they emerge. It is also important to be thinking about what happens beyond balance, and how to maintain balance. The department, in conjunction with Treasury Board, has begun the process of identifying key considerations and challenges in this effort.

The department has a good track record of responding to emergent issues in both policy and procedure. The department is always seeking to find efficiencies, often reliant on new technology and requiring new policies, processes and technology. Divisions are constantly striving to become more service oriented or improve their service delivery – whether this is payroll services, policy or accounting.

The department also provides leadership on financial reporting. Across government, the department provides ongoing support and assistance to other departments and entities in financial, accounting, fiscal, economic and statistical analysis to help ensure that the

government's fiscal plan is being adhered to on a corporate level.

The Department's management of the treasury functions for the Province, which includes cash and debt management, is done with a view to maximizing efficiencies and minimizing risks while keeping government's short term needs and long term objectives in mind. In the delivery of central client services, the department provides leadership in implementing changes in structures and processes that make operations more efficient within current resources. The divisions involved in service delivery are always seeking to find and improve efficiencies through modification or development of new policies and processes, as well as using technology.

#### Make health care better for you and family

The department's ongoing efforts to establish a sound fiscal framework and support good financial management and fiscal prudence allows government to allocate government resources to important priorities for Nova Scotians.

#### Create good jobs and grow the economy

The government has created a comprehensive, multi-sector approach to jobs and economic growth through the jobsHere plan. The Department of Finance's ongoing work in economic and fiscal information and policy supports the jobsHere plan and the corporate objective of increased investment and economic growth.
